## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 33-37, 42-44 and 46-56 are rejected under 35 U.S.C. 102(e) as being anticipated by Makower et al U.S. Pat. No. 6,190,353.

Makower discloses a device for positioning a filament in a body lumen having lumen walls, said device comprising: a flexible catheter; means advancable from the catheter for creating a second access penetration in the lumen wall and providing a filament path along the length of the body lumen between said first and second access penetrations, the means advancable also being retractable into the catheter after the second access penetration; and an expandable anchor disposed over at least a portion of the catheter (figs. 6c-6d, 11a-13e and col. 6, lines 21-58); as to claims 34-37, 42, (see above figs.); as to claim 43, (see above figs. and claim 21); as to claims 44 and 46-56 (see above rejections).

### *Response to Arguments*

Applicant's arguments with respect to claims 33-37, 42-44 and 46-56 have been considered but are moot in view of the new ground(s) of rejection.
